Acid decapsulation

Our latest Acid decapsulation system, the **ISA700DC™**, is the first negative pressure decapsulation system available in the market. No more acid projection, possibility to decapsulate device on PCB, easy control with our iPanel™ interface, and many more advantages ...

Contact us if you are interested or visit us at EPTC 2017

LASER decapsulation

A new **Green LASER pointer** is now available on all our LASER decapsulation systems. Thanks to this new feature, the focalization and the previsualization of your ablation area have been facilitated whatever the surface of your sample. This is a great improvement for users.

You want more information our upgrade your existing equipment, please **contact us** or visit us at EPTC 2017.

Exhibit

Digit Concept will be present at **EPTC 2017** in Singapore Grand Copthorne Waterfront Hotel – December 6-9, 2017
